EDUCATION

- | | | | |
|--------------------------------------|--------------|---|---------------------|
| Fudan University | Ph.D. | <i>Computer Science and Technology</i> | Sep 2026 – Present |
| Shanghai Jiao Tong University | M.S. | <i>Management Science and Engineering</i> | Sep 2023 – Jun 2026 |
- Honors: National Scholarship, First-Class Scholarship.
 - Selected coursework: Deterministic Operations Research Models, Stochastic Models, Advanced Microeconomics, Game Theory, Machine Learning Theory.
 - Thesis: *An Interactive Community Search Framework via Graph Active Learning.*
- | | | | |
|-------------------------------------|---------------|---|---------------------|
| East China Normal University | B.Eng. | <i>Data Science and Big Data Technology</i> | Sep 2019 – Jun 2023 |
|-------------------------------------|---------------|---|---------------------|
- GPA: 3.7/4.0. Honors: National Scholarship, First-Class Scholarship, Meritorious Winner in MCM/ICM.
 - Selected coursework: Modern Data Management Systems, Computer Systems and Cloud Computing, Operating Systems, Statistical Methods and Machine Learning, Algorithm Design and Analysis, Data Mining, Modern Artificial Intelligence, Deep Learning for NLP, Computer Vision.
 - Thesis: *Cryptocurrency Portfolio Management Based on Deep Reinforcement Learning.*

PUBLICATIONS

* Equal contribution. † Co-corresponding authors.

[C4] EVOSQL: Memory-Augmented Critic-Generator Co-Evolution for Text-to-SQL

Jiawei Zhou, Jianwei Wang, Chenyu Zhou, Chaojian Shi, Ming Dong, Kai Wang

EMNLP (FINDINGS) 2026

- Built a memory-augmented critic-generator co-evolution framework with execution verification, contextual memory, and SDPO, gaining up to +9.19 EX over Maj@16 and +6.13 EX over self-evolution on BIRD-Dev.

[C3] Modular Representation Steering for Multi-Attribute LLM Alignment

Chaojian Shi, Renhong Huang, Xulan Qiu, Jiawei Zhou[†], Yunsong Zhou[†]

EMNLP (MAIN) 2026

- Built a modular representation-steering framework that composes independently trained attribute modules in a frozen LLM, improving average rank by 37.4% across truthfulness, bias, ethics, and toxicity.

[C2] ARK: Answer-Centric Retriever Tuning via KG-augmented Curriculum Learning

Jiawei Zhou*, Hang Ding*, Haiyun Jiang

ACL (MAIN ORAL) 2026

- Developed an answer-centric retriever tuning framework for long-context RAG using LLM-constructed knowledge graphs and curriculum-based contrastive alignment, improving retrieval-generation performance by 14.5% F1 across 10 out-of-domain datasets.

[C1] TRUSTRESEARCHER: Automating Knowledge-Grounded and Transparent Research Ideation with Multi-Agent Collaboration
Jiawei Zhou, Ruicheng Zhu, Mengshi Chen, Jianwei Wang, Kai Wang
WWW (DEMO) 2026

- Built a multi-agent research ideation system with incremental knowledge graphs, graph-of-thought reasoning, and simulated expert review to generate evidence-grounded and transparent research hypotheses.

[J1] COMET: An Interactive Framework for Efficient and Effective Community Search via Active Learning
Jiawei Zhou, Kai Wang, Jianwei Wang, Kunpeng Zhang, Xuemin Lin
INFORMS JOC 2025

- Proposed an active-learning framework for large-scale community search that builds query-aware sub-graphs through Personalized PageRank conductance drops and models search as sequential node classification with low-complexity GCNs.

INTERN

Shanghai AI Laboratory	Research Intern	Aug 2025 –
• Working on self-evolving coding agents and co-evolving architectures spanning models, harnesses, and activation-steering mechanisms. • Investigation on the mechanisms behind post-training recipes, aiming to unify self-evolution, self-distillation, and self-play toward agentic systems capable of recursive self-improvement (RSI).		
WANO Shanghai	Algorithm Engineer	Apr–Oct 2025
• Built WANO-AGENT, a collaborative multi-agent framework based on MCP and DeepSeek-V3 for internal peer-review workflows. • Constructed a domain knowledge base with Milvus and decomposed fact extraction, report writing, and compliance checking into specialized agent roles. • Pilot deployment showed a 61.1% improvement in professional document preparation efficiency while strengthening factual accuracy and report consistency.		
CloudWalk	NLP Intern	Jul 2022 – Sep 2022
• Built a BERT–BiLSTM–CRF/SpanPSP prosody tagger and used self-training with active learning on unlabeled data, improving internal F1 by approximately 7%.		

ACADEMIC SERVICE

Reviewer	2026: AAAI; ACL Rolling Review (ARR) 2025: AAAI
Presentation	ARK, ACL 2026, San Diego

TECHNICAL SKILLS

Coding	Python, C++, PyTorch, Transformers, VeRL, slime, vLLM, SGLang, LLaMA-Factory, PEFT, Harnesses, Skills, MCP, Milvus, Faiss, Git, Docker
English	CEFR C2, TOEFL 100+, GRE 330, CET-6 620+
